

Polizeiboot W-3

No. 1000

Scale model of a coastal police boat to 1:25 scale

The robbe W-3 is a highly detailed scale model of a coastal boat used by the police service. This particular vessel is stationed at Emden, and its main tasks are to monitor coastal shipping and provide marine security, especially in the area around the entrance to Emden harbour. In designing this model we placed top priority on detailed scale reproduction of the full-size ship. The model's electric motors can be powered either by NC or lead-acid batteries.

Kit contents:

- Accurately moulded hull and deck shells with integral coaming
- Anchor housing, die-cut longitudinal bulkheads
- Die-cut motor bulkhead, injection-moulded rudder bushes
- Complete twin-blade rudder system, two contra-rotating 3-bladed propellers
- Clear moulded superstructure with window and door markings, wind deflector and funnel
- Roof and hatch cover, die-cut side panels, injection-moulded mast with integral detail features
- RC system installation components
- Small parts and accessories, window masks
- Building instructions and plan

Fittings set
